

Online Seminar: Ozone therapy susceptible to mitigate post & long-term COVID

Date: October 10, 2022
06:00 – 07:30 pm
Speakers: Prof. Dr. med. Harald Renz
Dr. med. Michael Schreiber
Presenter: Jonas Renz
Language: English
Registration fee: 38.00 Euro / Person

On the occasion of our online seminar, taking place on October 10, 2022 from 06:00 to 07:30 pm, Prof. Dr. med. Harald Renz and Dr. med. Michael Schreiber will be explaining in detail how the post and long-term effects of COVID can be mitigated by the means of ozone therapy, and will furthermore share their experience and findings gathered to date.

Prof. Dr. med. Harald Renz's contribution encompasses the following topics:

- COVID variants, vaccinations and side effects
- current knowledge on post and long-term symptoms of COVID
- Chronic inflammation with regard to long-term COVID symptoms
- induction of autoimmunity (diabetes type I, autoimmune blood vessel diseases, certain disorders)
- Organ failures and chronic diseases

Dr. med. Michael Schreiber will present the following topics:

- basic mechanisms of ozone therapy in general
- forms of ozone treatment
- focus on major autohemotherapy
 - practical experience and reference cases of post and long-term COVID symptoms
 - suggestions regarding the treatment schedule, such as ozone concentration, frequency and duration of one ozone treatment unit
 - possible combinations and vitamin cocktails

During the 90-minute seminar, participants will have the opportunity to ask questions and share their experience.

For registrations, please click on the following link

Online Seminar: Ozone therapy susceptible to mitigate post & long-term COVID

Our Speakers

Prof. Dr. med. Harald Renz

Prof. Dr. med. Harald Renz is Director of the Institute of Laboratory Medicine of the teaching hospital of Giessen and Marburg, as well as Professor at the Philipps University of Marburg, a position he has been holding since 1999. Since 2010 he has furthermore been acting as deputy speaker of the Universities of Giessen and Marburg and the Marburg Lung Centre (UGMLC), which constitutes one of a total of 5 sites of the German Centre for Lung Research (DZL). His research interests include the pathogenesis of allergies and asthma. He has made major contributions with regard to the development of asthma in consideration of the pre- and postnatal environment. During the years of 2012/13, he acted as visiting professor and Fulbright scholar at the Harvard Medical School of Boston. From 2015 to 2021 he was Chief Marketing Officer of the teaching hospitals of Giessen and Marburg <Gießen und Marburg GmbH> at the site of Marburg. From 2010 to 2016 he was President of the German Society of Allergology and Clinical Immunology (DGAKI) and since 2018 he has been Vice President of the German Society of Laboratory Medicine (DGKL). Currently, he holds several visiting professorships abroad (Sechenov University of Moscow, Russia; Kilimanjaro Christian Medical College, Moshi, Tanzania).

Dr. med. Michael Schreiber

Dr. med. Michael Schreiber is a medical specialist for Internal Medicine and Naturopathy.

Besides operating his medical practice as panel physician and internist, he has been actively assisting the executive committees of numerous naturopathic societies. For many years, he has been a committed speaker of naturopathic training courses, especially on the topic of ozone/oxygen therapy, both on an international and national basis. Furthermore, he acts as second member of the Board of the Medical Ozone Society.

Online Seminar: Ozone therapy susceptible to mitigate post & long-term COVID

Moderation

Jonas Renz

In 2022, Mr. Jonas Renz joined Hänsler Medical GmbH as CEO. He has also been CEO of Kastner-Praxisbedarf GmbH (“Kastner”) since the year 2019, acting as deputy PRRC / security officer, and furthermore takes care of all technical and clinical aspects of ozone therapy within his position as Head of Development and Production.

Prior to taking over the Kastner Company in 2019, and partly also simultaneously, he acted as co-founder and General Manager of two innovative, biopharmaceutical companies (2009-2021), again intensively dealing with new clinical development candidates and the interaction of administrations. He thus counts over ten years of relevant professional experience in terms of clinical evaluation of medicinal products, and has, as a co-author, contributed to several relevant scientific publications.
